② A continuación, haga clic en el enlace al manual del producto de la página de detalle del producto.

Orion Dynamo Pro 155Wh AC/DC/USB Lithium Power Supply

Addendum to Instruction Manual IN 601

Figure 1. The DC car charging adapter

The included DC charging adapter (**Figure 1**) is intended to charge the Dynamo Pro via the 12v cigarette outlet in your car. **It is NOT intended to be a telescope power cable.** Even though the tip may fit your telescope power input, please do not use this short cable to power your equipment. The fuse in the tip of this cable is rated at 2 amps. That is enough to charge the Dynamo Pro via the car, but a GoTo mount may pull more than 2 amps, leading to the fuse blowing. For powering a telescope, please use the cable that came with your mount, or contact Orion to purchase a longer power cable with a higher amperage fuse.

When the Dynamo Pro is in use, if the power output becomes high enough, an internal fan will switch on to keep the electronics cool. It may cycle on/off repeatedly in order to preserve power depending on the power output. This is normal operation.
